Education

- **Bogazici University** — Istanbul, Turkey
  MSc in Computer Engineering: 3.86/4 GPA — *Sep. 2022 – Feb. 2026*
- **Bogazici University** — Istanbul, Turkey
  BSc in Mechanical Engineering: Top 15% in class — *Sep. 2017 – June 2022*

Experience

- **ETH Zurich - Peach Lab - April Wang** — Zurich, Switzerland
  Research Assistant — *Mar. 2026 – Mar. 2027*
  - Integrating collaborative **XR** systems for tangible prototyping with **spatial and embodied interactions**.
- **MIT CSAIL - HCI Engineering Group - Stefanie Mueller** — Remote
  Research Collaborator — *Oct. 2025 – Jan. 2026*
  - Collaborating on extending **XR** frameworks by integrating **Generative AI** for **in-situ 3D modeling**.
- **Kordsa** — San Diego, California
  Software Developer — *March 2022 – Oct. 2022*
  - Developed an application with **Unity Engine** using **C#** to simulate the manufacturing of composite honeycomb structure. The program includes interactive visual animations and informative graphs.
  - With the help of the application, the **produced material throughput efficiency has increased by 50%**. The produced materials are distributed to organizations such as **NASA** and **Airbus**.
- **FEV** — Istanbul, Turkey
  Computer Aided Engineering - Intern — *July 2021 – Aug. 2021*
  - Created a tool that generates 3D polygonal modeled mesh groups using **Python** for **Abaqus**, with the aim of automatizing manual meshing, **increasing efficiency by 5x**.

Publications

- **Demonstration of MiXR: Harvesting and Recomposing Geometry from Real-World Objects for In-Situ 3D Design.** [Paper]
  Faraz Faruqi, Demircan Tas, Arthur Caetano, Niccolo Meniconi, **Oğuz Arslan**, Misha Sra, Ruofei Du, Stefanie Mueller, Mustafa Doga Dogan.
  (ACM DIS'26). Companion Publication of the 2026 ACM Designing Interactive Systems Conference.
- **TinkerXR: In-Situ, Reality-Aware CAD and 3D Printing Interface for Novices.** [Project Page]
  Oğuz Arslan, Artun Akdoğan, Mustafa Doğa Doğan.
  (ACM SCF'25). In Proceedings of the 2025 Symposium on Computational Fabrication.
- **peaRL: Spatio-Temporal Graph Learning for Predictive & Exploratory Analytics in Esports: A Rocket League Case Study.** [Thesis]
  Oğuz Arslan. Advisor: Suzan Üsküdarlı.
  MSc Thesis, Bogazici University, 2026.

Talks

- **Guest Lecture**, *Tangible Interaction* (Prof. Morten Fjeld), Chalmers University of Technology, Gothenburg, Sweden, Mar. 2026.

Service

- **Reviewer:** ACM Conference on Human Factors in Computing Systems (CHI 2026)

Skills

- **Programming Languages:** Python, C, C++, C#, Java, PyTorch, SPARQL
- **Courses:** ML, NLP, Semantic Web, Operating Systems, Discrete Math, Data Structures & Algorithms
- **Software:** Android Studio, MATLAB, Jupyter Notebook, Unity, Arduino, Git, Protégé, Solidworks, XR Tools
- **ML Frameworks:** Decision Trees, Random Forest, XGBoost, MLP, LSTM, GCN, GAT, k-NN, SVM

Achievements

- Placed **top 400** in Turkey National University Entrance Examination among 2 million candidates in 2017.
- Placed **top 70** in TUBITAK National Physics Olympics exam among all high school students in 2015.
